

UNIVERSO

Totally dry after about 3 hours.

Fully washable with not aggressive soaps.

Conservation: in a dry, cool place, away from the frost and humidity.

Step 1 - Start applying a first coat of Primus Sabbia with a brush on properly cleaned and insulated ceilings and walls.

Step 2 - Dilute Crea il Tuo UNIVERSO with water up to a maximum of 10%.

Step 3 - On the ceiling, apply the product with a medium-haired roller (if necessary, apply a second coat)

Step 4 - On the walls apply with a brush (recommended to get thicker and thus better grip of the "stars"). In areas accessible by the children we recommend a protective coat with Vetro to protect the "stars" and to make the surface frequently washable.

Step 5 - When dry, the surface will lit its stars, if previously lit by direct light.

Step 6 - To get a "more enlightened Universe", we recommend using a special ultraviolet neon lamp, which can be added to existing lighting system.
